 Because Color Matters

STEP 3 PLACE THE SpyderTV COLORIMETER ON YOUR SCREEN

There are 2 ways to place the SpyderTV colorimeter on your screen:

a. Suction cup

b. Tripod

STEP 4 SET UP TO OPTIMIZE YOUR DISPLAY

Insert the USB connection of the SpyderTV colorimeter into the USB port on your computer.

Clicking on your SpyderTV icon on your desktop, launch the SpyderTV software.

STEP 1 BEFORE YOU START

Ensure that all necessary hardware is available (desktop or laptop PC nearby, DVD player, remote control for your DVD and for your display)

Insert your Test Pattern and Instructions DVD and select the **How to Use SpyderTV** menu item to learn how to optimize your TV.

STEP 3a USING SUCTION CUP TO PLACE THE SpyderTV COLORIMETER ON YOUR SCREEN

Slide the suction cup down the wire so that it is on the SpyderTV leg.

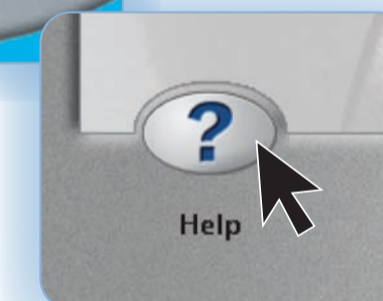

Attach the suction cup to the TV so that the SpyderTV is in the center of the screen.

WARNING: Do not press the suction cup down too hard. Be sure to use the release tab when removing the suction cup.

STEP 5 OPTIMIZE YOUR DISPLAY

Follow the steps of the software wizard to complete your optimization using the "help" files screens for a more in-depth explanation of each step.

STEP 2 INSTALL YOUR SOFTWARE

Install your SpyderTV software following on-screen instructions

STEP 3b USING A TRIPOD TO PLACE THE SpyderTV COLORIMETER ON YOUR SCREEN

Tripod not included.

Snap the suction cup onto the SpyderTV. Then, screw the device to the tripod mount.

Attach to any standard tripod. Place the tripod with the SpyderTV against the TV. Tilt and adjust the tripod so your SpyderTV touches the TV in the middle and is perfectly flush.

STEP 6 CHECK BEFORE AND AFTER IMAGES

From the Main Menu of the DVD, select **Before & After Images** to see the improvement in your picture.
